

ALEKSANDR KORCHUGANOV

+7 (902) 141-98-81 ◇ Moscow, Russia

akorchuganoff@yandex.ru ◇ <https://github.com/akorchuganoff>

OBJECTIVE

Python software developer with 9 month of experience in investmachine.io and dba.ooo seeking full-time trainee and junior developer roles.

EDUCATION

Bachelor of Computer Science, Higher School of Economics, Moscow

Expected 2026

SKILLS

Technical Skills Flask, FastApi, Postgres, SQLAlchemy, Git, Docker, RabbitMQ, Algorithms , C++

Soft Skills Sociability, Responsibility, Efficiency, Leadership qualities

EXPERIENCE

Trainee ML Developer

May 2021 - Sep 2021

”OOO DBA”

Barnaul, Russia

- Took several courses on Computer Vision
- Invented and implemented solutions to problems in the field of Object-detection, Image-segmentation and Image-Classification
- Found an idea to improve the quality of the model and explained it at the presentation. Later it was considered important and implemented, but by that time - I was no longer in the company.

Junior Python Developer

Nov 2021 - March 2022

Invesmachine.io

Remote, Russia

- Used libraries for data aggregation.
- Received data via API and processed them in accordance with the terms of reference.
- Worked in a team with an economist, maintained friendly and professional relations.

PROJECTS

Transactions A small project in which I tried to hone a micro-service approach to architecture. Also, on this project I got acquainted with Docker and Docker Compose for the first time. I also want to add a message queue to it, but so far I haven't gotten around to it.

StockWebParser. This project is a telegram bot using webhooks. It receives data from the exchange via the API and issues them to the user. On it, I honed my skills working with public APIs, as well as working with databases.

Trade system This project was written with my friend as part of a hackathon. A small bulletin board, with a pleasant color scheme and modest functionality.

EXTRA-CURRICULAR ACTIVITIES

- In my free time I read literature about psychology. The last book I read was Eric Byrne's "People Who Play Games"
- I like team sports like volleyball or hockey. It is important for me that the result depends on the work of the team, but the personal qualities of the players are also visible. That's why I don't like, for example, rowing.

LEADERSHIP

- I am one of the founders and direct leaders of the student organization that conducts events. There are 13 people in our team. Sometimes it is difficult to control them, but it seems that we are successfully coping
